

Week 7 Activity Storyboard and Interactive Module

Attached are 5 Shark Tank Instructional slides presented in Powerpoint.

Need/Objective: I developed the Shark Tank Instructional Module to educate business owners on how to successfully get invited to appear on Shark Tank. The Shark Tank Instructional Module encompasses key tasks that must be mastered to be successful.

Reflection on how your module supports your objective: My module supports my objective by providing important information that a Shark Tank Participant needs to know. The major tasks encompass discussions on such topics as Know your Numbers, Create an Engaging Pitch and Preparing for the Audition. At the end of the course there is an assessment to test the learner's knowledge of the course materials.

I used Powerpoint as my e-authoring tool. I have always used Powerpoint in developing presentations, and courses. It has been an effective authoring tool for me. Below are some good links that discuss using Powerpoint for e-authoring.
